## eXtended EudraVigilance Medicinal Product Report Message (XEVPRM) Step-by-Step guide

Maintenance operations: Update of development medicinal product (DMP)  
entity in the XEVMPD

Table of contents

1.1. Example specifications..... 3

1.2. Retrieve the DMP entity in the XEVMPD..... 4

1.3. Create an XEVPRM..... 7

1.4. Validate and send an XEVPRM .....13

1.5. Retrieve the XEVPRM Acknowledgement (XEVPRM ACK) .....18

Product and sponsor information used in this step-by-step guide is fictitious and intended for demonstration purposes only.

### **1.1. Example specifications**

For the purpose of this step-by-step exercise, we will be updating our previously submitted DMP with the product name 'ProductX 100ml solution', which is available in the XEVMPD with the assigned EV Code PRD126007.

The following information will be amended using operation type 'Update (2)':

- the product code 'PRX-100' will be entered in the 'Product Code' data element;
- the route of administration (RoA) 'intramuscular use' will be entered as an additional route of administration.

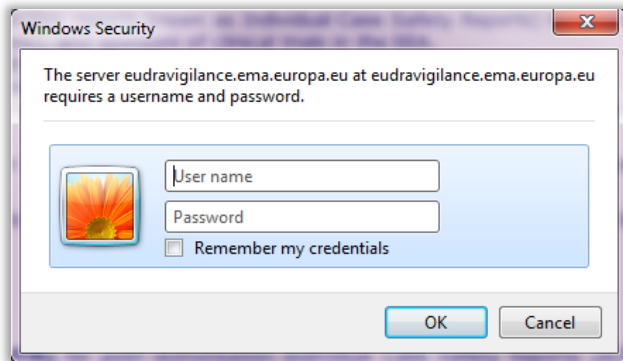

## 1.2. Retrieve the DMP entity in the XEVMPD

- 1) Log in to the requested EVWEB environment:

EVWEB production: <https://eudravigilance.ema.europa.eu/x>

XCOMP (test) environment: <https://evtest.ema.europa.eu/x>

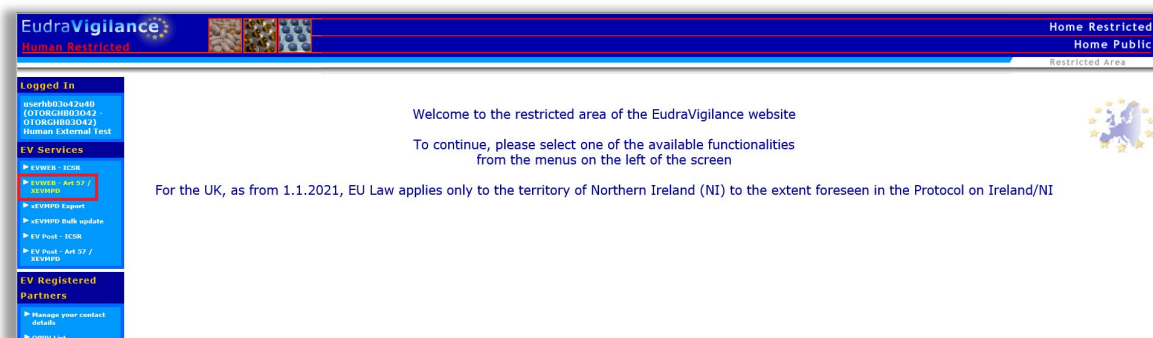

EVWEB training environment: <https://eudravigilance-training.ema.europa.eu/x/>

- 2) Select the organisation under which you wish to log on:

- 3) In the restricted area, click on 'EVWEB - Art 57 / XEVMPD':

You are now logged in EVWEB; the organisation ID under which you are logged in is shown in the top right corner:

- 4) Go to the 'Medicinal Products' section and using the simple or advanced query, retrieve the specific product entry.

For this demonstration, the search is performed for a DMP with the assigned EV Code PRD126007 using a simple query:

WEB Trader | Create and Send Product Reports | Medicinal Products | MedDRA

### 1.3. Create an XEVPRM

- 1) Click on the 'XEVPRM Message' text in your tree-view area:

The screenshot shows the 'WEB Trader' application with the 'MedDRA' tab active. In the left tree view, 'XEVPRM Message' is highlighted. The right pane shows a table with the following data:

Description	Name/Value
EV Code	PRD126007
Type	Development
Operation Type	Update
New Owner ID	
Sender Local Code	
Sponsor	SPONSOR ABC LTD
Product Code	
Product Name	ProductX 100ml solution
Product Other Name	
Comment	Pharmaceutical Products (1) Drug ATCs (-) Drug Indications (1) Product Attachments (1)

The active area will show the 'XEVPRM Number' field; the area next to the 'Message Number' will be highlighted in blue:

The screenshot shows the 'WEB Trader' application with the 'MedDRA' tab active. In the left tree view, 'XEVPRM Message' is highlighted. The right pane shows a table with the following data:

Description	Name/Value
Message Number	

The 'Message Number' field is highlighted in blue. A note 'Field is Mandatory' is visible to the right of the field.

- 2) Click on the 'E' (Text Edit) button or use 'Enter' on your keyboard to activate the field, and you will be able to write the name you wish to assign to your XEVPRM:

The screenshot shows the 'WEB Trader' application with the 'MedDRA' tab active. In the left tree view, 'XEVPRM Message' is highlighted. The right pane shows a table with the following data:

Description	Name/Value
Message Number	PRD126007

The 'Message Number' field is highlighted in blue. A note 'Field is Mandatory' is visible to the right of the field.

- 3) Once you enter the required message number or name press 'Enter'; the text that you entered will appear in blue:

The screenshot shows the 'WEB Trader' application with the 'MedDRA' tab selected. The left pane displays a tree view under 'XEVPRM Message' with 'Products' expanded. The right pane shows details for 'PRD126007'.

Description	Name/Value
Message Number	PRD126007_update
	Products
	Substances
	Sources
	Organisations
	ATC Codes
	Pharmaceutical Forms
	Routes Of Administration
	Attachments
	Master File Locations

- 4) Click on the product EV Code/name in the tree-view area; the active area will display the fields of your DMP; the 'Operation type' field displays 'Update (2)' as a default. It is not possible to assign a different operation type:

The screenshot shows the 'Update - Development - PRD126007 - ProductX 100ml solution' selected in the tree view. The right pane displays details for 'PRD126007'.

Description	Name/Value
EV Code	PRD126007

Operation Type	Update
Sender Local Code	
Sponsor	SPONSOR ABC LTD
Product Code	
Product Name	ProductX 100ml solution
Product Other Name	
Comment	Pharmaceutical Products (1) Drug ATCs (-) Drug Indications (1) Product Attachments (1)

- 5) As per our specific example, we wish to add the code of the product to the DMP information. To do so, click on the area next to 'Product Code'. The value of this field will be highlighted in blue:

The screenshot shows the 'Product Code' field highlighted in blue in the right pane. The left pane shows the tree view with 'Update - Development - PRD126007 - ProductX 100ml solution' selected.

Description	Name/Value
EV Code	PRD126007
Type	Development
Operation Type	Update
Sender Local Code	
Sponsor	SPONSOR ABC LTD
Product Code	
Product Name	ProductX 100ml solution
Product Other Name	
Comment	Pharmaceutical Products (1) Drug ATCs (-) Drug Indications (1) Product Attachments (1)

- 6) Press 'Enter' on your keyboard or click on the 'E' (Text Edit) button to activate this field. You can now enter the required text in this field:

WEB Trader | Create and Send Product Reports | Medicinal Products | MedDRA

PRD126007

Description	Name/Value
Route Of Administration	INTRAMUSCULAR USE

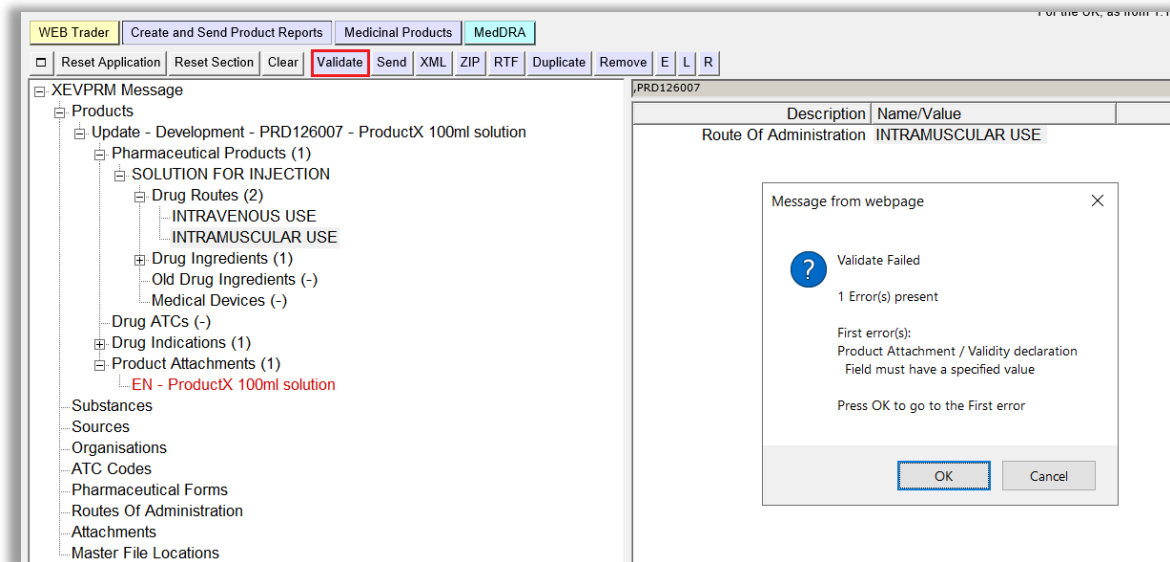

We have now amended the fields as per our example specifications.

## 1.4. Validate and send an XEVPRM

- 1) Validate your XEVPRM by clicking on the 'Validate' button:

In case of any errors, a warning message will be displayed; the section, where these errors occurred will be highlighted in red and/or the fields where information is missing will contain the text 'Field is Mandatory'/'Field must have a specific value'/'Field is Mandatory Optional'.

- 2) To correct the error(s), press 'OK' on the warning message or click on the area highlighted in red in the tree-view area.

Since we are performing an update of a DMP, as per the applicable business rules, we must confirm that the referenced PPI attachment is still valid.

The 'Validity declaration' field is a field that will allow you to select one of the available pre-defined values.

Using your mouse, click on the area next to 'Validity declaration'. The area will become highlighted in blue:

Description	Name/Value	
Product Attachment	EN - ProductX 100ml solution	
Validity declaration		Field must have a specified value

Press 'Enter' on your keyboard, double-click on the field, or click on the 'R' (Remote look-up) button. The values available for this field will be displayed:

Description	Name/Value
Product Attachment	EN - ProductX 100ml solution
Validity declaration	<div> <div>Select option</div> <div>Press A - Z to find initial letter Press Enter to select, Escape to clear</div> <div>Valid</div> </div>

Field must have a specified value

Using your mouse, select the requested value. Once you click on the selected value, it will be displayed in the 'Validity declaration' field:

The screenshot shows the WEB Trader interface with the 'MedDRA' tab selected. The 'XEVPRM Message' window is open, displaying a tree view of the product structure on the left and a table of data on the right. The table has two columns: 'Description' and 'Name/Value'. The data row shows 'Product Attachment' with the value 'EN - ProductX 100ml solution' and 'Validity declaration' with the value 'Valid'.

3) Validate the XEVPRM again; if there are no errors, the below window will be displayed:

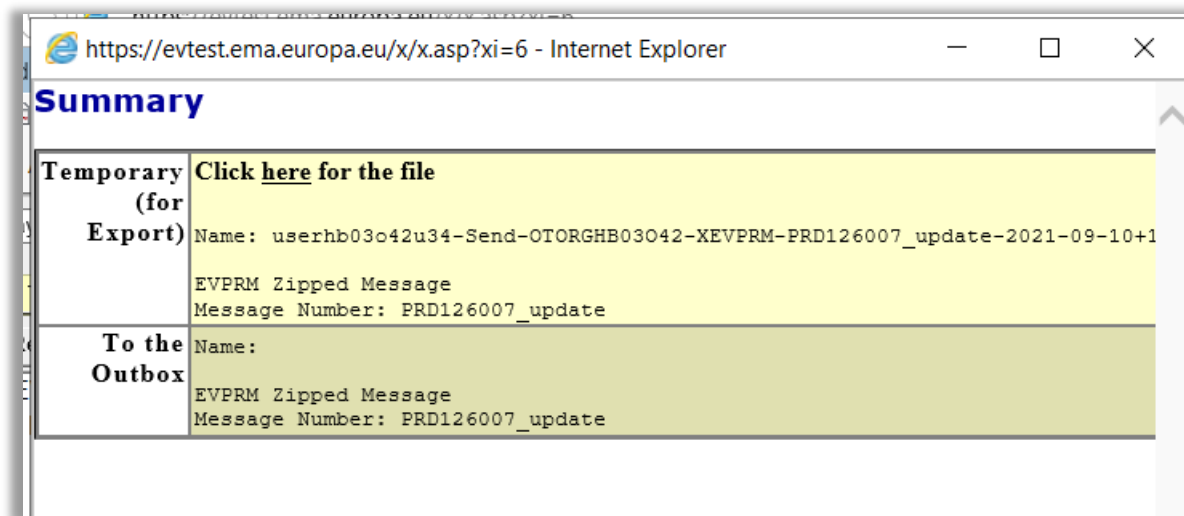

The screenshot shows the WEB Trader interface with the 'MedDRA' tab selected. The 'XEVPRM Message' window is open, displaying a tree view of the product structure on the left and a table of data on the right. The table has two columns: 'Description' and 'Name/Value'. The data row shows 'Product Attachment' with the value 'EN - ProductX 100ml solution' and 'Validity declaration' with the value 'Valid'. A dialog box titled 'Message from webpage' is displayed in the foreground, containing a yellow warning icon and the text 'Validate OK' with an 'OK' button.

You can dismiss the validation message by clicking on 'OK' or 'x' in the right-hand corner of the window.

If you wish, you can save the XEVPRM (**prior to its submission**) for your reference by selecting the relevant button:

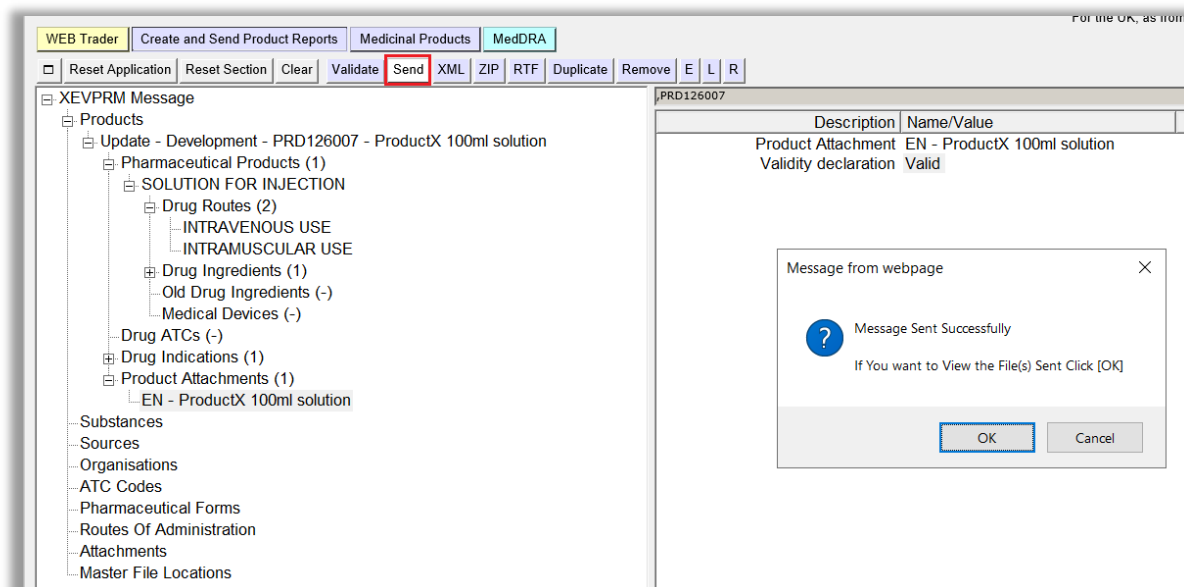

Upon clicking on the required option, a new window will open:

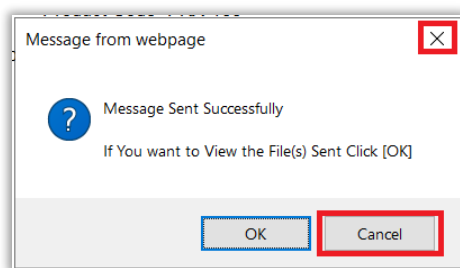

By clicking on 'here', a new window will open, and you will be able to save the file on your computer.

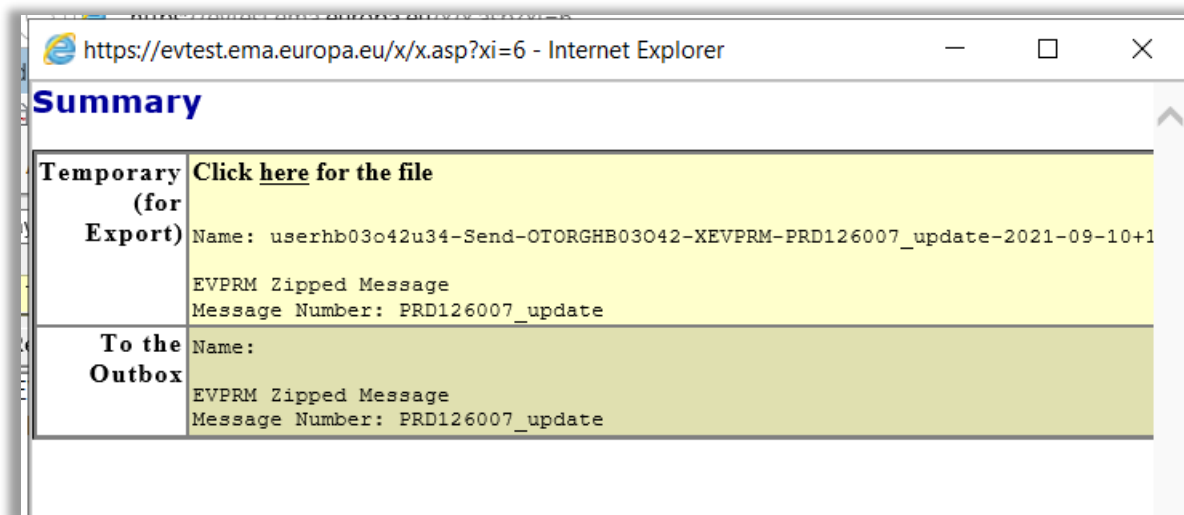

- 4) To send the XEVPRM, click on the 'Send' button. The below message will be displayed on your screen:

If you wish to dismiss the message, click on 'Cancel' or 'x' in the right-hand corner of the message:

To view/save the **submitted file**, click on 'OK'; the below message will be displayed, enabling you to save your XEVPRM file on your computer:

By clicking on 'here', a new window with the XML file of your submitted XEVPRM will open:

```

  </developmentPresentationName>
  - <productIndications>
```

You can save the XML file of the submitted XEVPRM on your computer either by using the 'File'/'Save As' option (if available) or by using Ctrl+S on your keyboard.

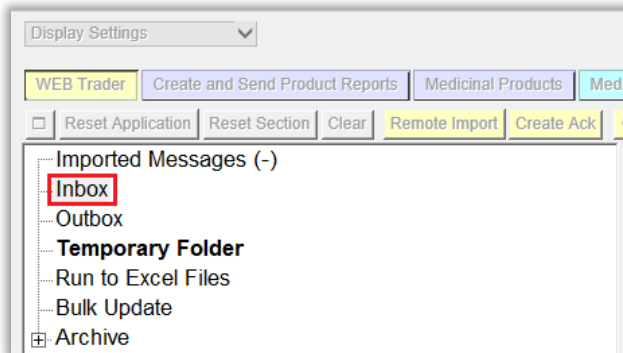

You have now successfully submitted an XEVPRM with operation type 'Update' (2) for a development medicinal product entity.

## 1.5. Retrieve the XEVPRM Acknowledgement (XEVPRM ACK)

- 1) In EVWEB, go to the 'Web Trader' section:

- 2) Click on 'Inbox' (or 'Archived Inbox' under 'Archive', depending on when you decide to retrieve your XEVPRM ACK). The application will appear 'frozen' for a second or two:

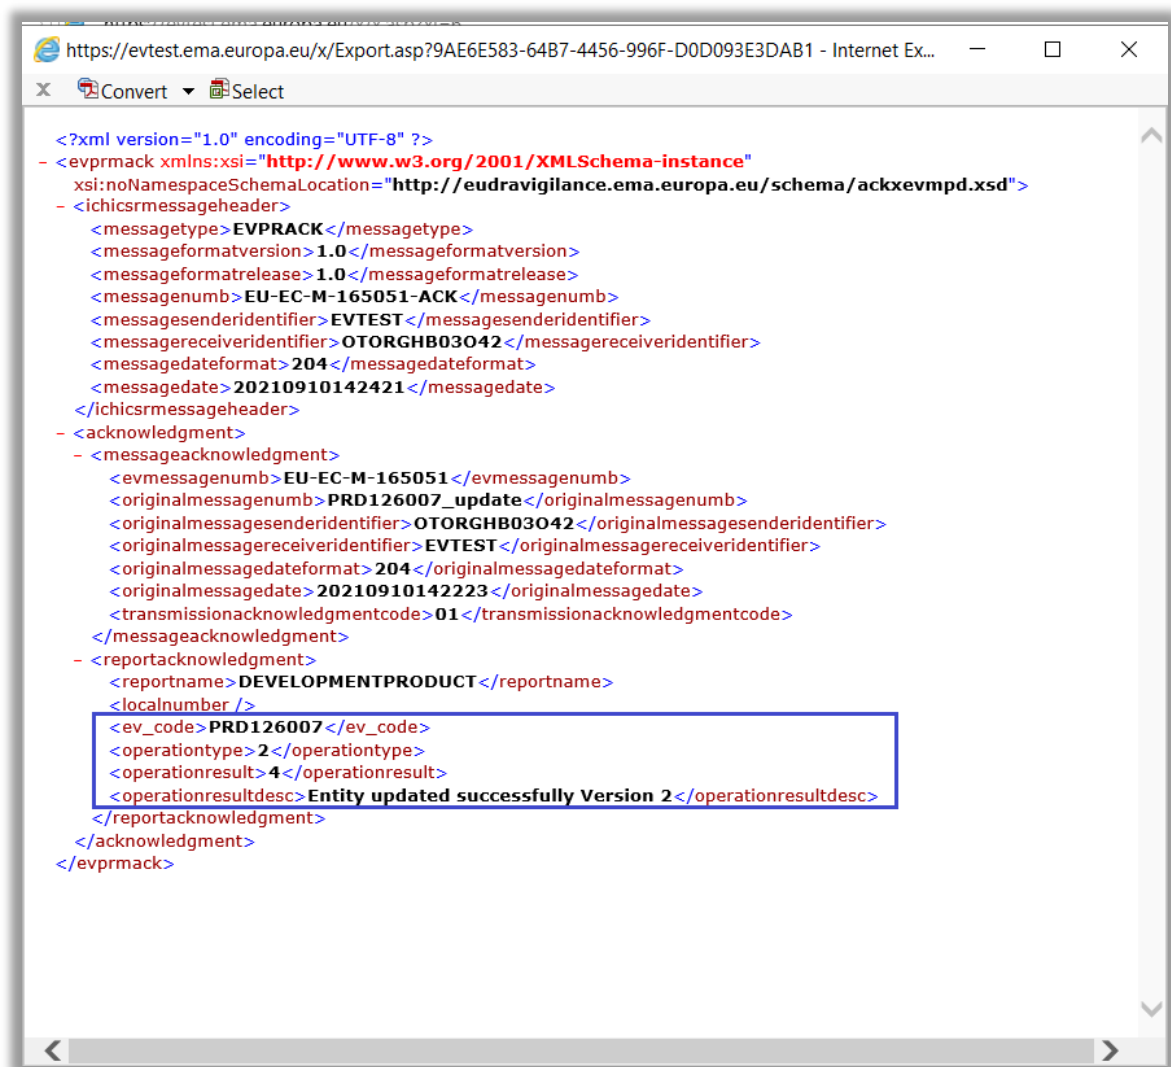

After a few seconds, the active area will display XEVPRM ACKs sent to your organisation's ID; the first message will be automatically highlighted in blue:

To view the ACK name in full, expand the section by placing your cursor on the separator line between 'Name' and 'Num/Count', click and drag towards the right until the full name is visible:

- 3) Based on the XEVPRM number, which you assigned to your message, find the XEVPRM ACK. Click on the relevant row with your mouse (the message will be highlighted in blue). Press 'Enter' on your keyboard or double-click with your mouse, and the XML of the XEVPRM ACK will be displayed on your screen, showing the operation result for the relevant entity:

The ACK confirmed that the update of the DMP in our example was successful.

- 4) You can save the XML file of the submitted XEVPRM on your computer either by using the 'File'/'Save As' option (if available) or by using Ctrl+S on your keyboard.

You have now successfully retrieved the XEVPRM Acknowledgement confirming that your product entity was updated successfully.

In case the update would not be successful, the operation result would contain a different message, indicating why the required operation was not performed on the entity. The list of negative operation results is available in the '**Ack - Failure codes**' spread sheet of the [EudraVigilance eXtended medicinal product dictionary acknowledgment codes Excel file](#) published on the '[Guidance documents](#)' webpage.

Based on the acknowledgment, you should amend the information that led to the negative acknowledgement as per the 'operation result' message and resubmit the XEVPRM.
